Objective

Aspiring NLP Engineer building innovative real-world systems. Currently developing an AI Keyboard Chatbot that mimics user behavior using NLP. Seeking opportunities to apply ML in impactful projects.

Education

Green University of Bangladesh

BSc in Computer Science and Engineering

Oct-2022 – Present

CGPA: 3.96 / 4.00 (Till 8th Semester)

Projects

SmartMach: AI-powered Predictive Maintenance Platform: Developed an AI-based platform for predictive maintenance to detect equipment failure before it happens. Uses ML models to analyze real-time sensor data for industrial safety and cost efficiency.

Live Demo: [Click Here](#)

AI Project using Shell Script (Ubuntu Environment): Developed an interactive shell-based chat system with integrated games like Tic Tac Toe, Snake and Ladder, and Rock-Paper-Scissors. Focused on improving user experience and logic-based interactions.

Experience

YouTube Tutor: Machine Learning Playlist

Online

2024 – Present

- Created 50+ educational videos on Machine Learning. **Playlist:** [Click Here](#)
- Built audience around board-style whiteboard classes on YouTube.

Achievements

- Shortlisted Finalist — VisionX Project Showcasing Competition (National Level)**
Organized by Dhaka University; among top 20 shortlisted teams nationwide. Project showcased: "SmartMach: AI-powered Predictive Maintenance Platform". Final round scheduled on 15 November 2025.
- Selected for Phase 1 — Solvio AI Competition (2025)**
Advanced to Phase 2 for the Solvio Hackathon selection round. Project: "SmartMach: AI-powered Predictive Maintenance Platform".

Competitive Programming

- Codeforces handle: **Iftikhar12** — Solved 180+ problems; current rating: 900 (Newbie).
- LeetCode handle: **Iftikhar_Hasan62** — Solved 100+ problems.

Skills

Languages: Python, Java, C/C++, SQL, Shell Script

Data Science: scikit-learn, Pandas, NumPy, NLTK, ANN, RNN, Keras, TensorFlow

Development Tools: Git, GitHub, Overleaf, VS Code, Cloud Deploy, NetBeans, MS Word, MS Excel
